EDITORIAL COMMENT

RAILROAD FOR MANHATTAN.

Manhattan is in the field for a railroad. It is proposed to construct a road from the camp to this city, and extend it north to Round Mountain, and possibly to Austin.

Manhattan is to be congratulated upon its enterprise, and a railroad is just what the camp needs. There is considerable high grade ore, which is now going over the dumps, there to remain until the construction of the mills, which is going along at a rapid rate. It may not be known to outsiders, but it is a fact that ore is being shipped from Manhattan which will go as high as \$300 and \$400 a ton. Ore that will go as high as \$100 a ton, ordinarily as good shipping ore as one would want, cannot be shipped on account of the high transportation charges. It might be shipped, of course, but it would be a waste of money to do so.

A railroad would bring Manhattan so much nearer to Tonopah, which is the center of the camp's supplies, and it would make traveling more popular, and bring into that country crowds of visitors, just what the camp desires, and for what it is reaching out. There is no doubt that Manhattan is going to boom again, not as a stock speculation, but as a camp for good solid investment. There is every reason for this, the principal one being that the camp has the ore, milling ore of a high grade. What Manhattan wants is to let the world know what we know about her, and what the true condition is in the camp.

It is enough to let the truth be known. And that means that Manhattan, for its age, is one of the richest mining camps in this or any other State. Investigation will prove this assertion, and investigation will be followed by investment.

ADVANCE IN TONOPAHS.

The news of a decided advance in the value of Tonopah stocks will be received with pleasure in Reno, by holders and non-holders alike.

While the greater energy and more spectacular developments of Goldfield have overshadowed the achievements of her sister camp, Tonopah's importance to the progress of Nevada is not to be underestimated. It must not be forgotten, either, that it was the discovery of Tonopah that led to the new era in Nevada's mining fortunes.

Tonopah is anything but a "boom camp." She is not great at advertising. Her's is the calm serenity of assured fortune. She has great wealth in her possession, and she cares not very much whether the world at large knows about it; she knows, and she is sufficient unto herself.

The ore deposits at Tonopah are very much like those of the Comstock and the ore itself strongly resembles Comstock ore. The Comstock at Tonopah's present age was not much more of a camp. She was fully ten years older than Tonopah is now when her biggest bonanza was found. Tonopah's present resources will insure her being worked for at least fifteen years to come, and there is no telling what great discoveries may in the meantime be made.—Reno Gazette.

NEW FUNNY SHOW AT THE BUTLER

The popular fun makers of the Griffiths Musical Comedy Co. will be seen in a new bill tonight at the Butler Theater. The piece is "A Plenie at Millers," and depicts the happenings of a party preparing for a picnic at the town of Millers. Billy Ouslow will have a comical role as Dennis Finnigan, one of the upper ten, and Eddie O'Brien will have ample opportunity for fun making in the role of Mike Rafferty, of the lower five. Fred L. Griffiths will be the young city chap, Miss Helen Douglass will portray the leading role of Finnigan's mischievous daughter, and Miss Marie Celestine will have a funny character role. There will be musical numbers by each of the principals and the popular dancing chorus will be seen in each feature. Patrons may anticipate a laughing festival, equal to anything yet presented in Tonopah. New and sensational moving pictures, under the efficient operation of "Spud" Murphy, will also be a feature.

The matinee this week will be held on Saturday afternoon at 3 o'clock, instead of Sunday, so as not to interfere with the great Elks and Eagles ball game. The management was disappointed in not having their two new chorus girls for Friday evening, but will have six for Saturday, and promises the patrons one of the prettiest and neatest choruses in the land.

It is a well known fact that persons living in the Pine forests do not suffer from kidney diseases. One dose of Pineules at night usually relieves backache, 30 days' treatment \$1.00. Your money refunded if not satisfied. Sold by Tonopah Drug Co.

BULLFROG IS BETTER THAN EVER

JUDGE HOGGATT GIVES REASONS FOR ITS SPLENDID SHOWING.

Judge Volney T. Hoggatt of Bullfrog, brisk, pleasant and as busy as ever, is with us once again. The Judge is one of the heaviest stockholders in the West Extension of Bullfrog, and he and Len McGary of Rhyolite have several properties in the district of Lee, one of the most promising young camps of this section.

"Bullfrog is looking today a thousand per cent better than ever in her history," said Judge Hoggatt, "and I will tell you why. You know this is a country of low foothills, and it is a country in which to find ore we must sink shafts. The great number of people interested in Bullfrog drove tunnels instead of sinking, and what was the result? Little seams of mineral without any ore bodies, but enough to make a showing and to sell stocks on. It is cheaper to drive a tunnel than to sink a shaft.

"The best geologists in the United States are unanimous regarding the formation of the Bullfrog district. It is that of different flows of rhyolite; and the ore deposits have been formed by golden solution coming up from the depths, and silicifying the rhyolite in their upward course, and coming to the surface in small seams or cracks. Whenever these seams have been followed down, they have invariably led to ore bodies.

"Take the West Extension, for example. We started on a little sear, and went through eighty feet of rhyolite capping. The little seam had a hard time existing, and its average value all the way down was about two dollars a ton, until we struck the ore body, when we got values as high as \$2600 a ton. Had we tunneled all through, we would have continued to get little seams, as has been the case on many other properties, which started off on their work in that manner. Take all the district, and you will find that all the tunnels passed through hard rhyolite, intercepting small seams, which, had they been followed down, I am willing to bet, would have developed into ore bodies.

"The Tramps is an example of this. Superintendent Blackmer got tired of tunneling and then started a winze. The result is that during the past week they have got by far the best showing the mine ever had. They have higher mineralization, and they are getting into the characteristic green ore that we have on the West Extension. At a vertical depth the ore goes from \$55 to \$375.

"To show what depth will do, in the drifts of the West Extension at the 100 and 200 levels—in fact, all the work discloses the fact that wherever these seams occur, the values immediately surrounding them are far in excess of those at more remote points. And the values at the 200 are one-third in excess of those at the 100 level. This goes to show that all the country needs is depth. I won't tell you what the average is for a shoot of ore we have which is thirty feet wide, by forty feet, and along for a distance of 600 feet, for you would hardly credit it. Suffice it to say, that it is a very high grade of milling ore, and anybody who wants to come down and look at it is welcome, mining men in particular. And we will take care of our visitors and give them the best of everything to eat and drink while they are with us, I am merely saying this for the sake of the district, for we have nothing to sell.

"We have a million dollars in sight, so we are not worrying. We have some good interests in the Lee district, and take it from me that there is one of the best young camps in the State. We have some fine showings here, but have not attempted to sell any stock, preferring to develop it with our own money, before risking that of others. There are eight or ten properties working, and when the Tonopah and Tidewater road gets in there, which will be in about a week, there will be ready to ship a trainload of ore."

Journals, cash books and ledgers—just the thing the merchant needs—best that can be made. For sale at the Bonanza office.

WILL GET THEIR MONEY'S WORTH

THOSE ATTENDING THE EAGLE-ELK BALL GAME NEXT SUNDAY.

Ho, for the ball game.

Dave Holland's hands look like putty, and Harry Epstine feels as if he is walking on stilts. Chief of Police Malley is nearly all in from practicing so hard. It is astonishing to note the difference of opinion on the merits of the two teams.

"No chance," says Charley Cameron, Eagle. "The Elks won't be one, two, six."

"The Elks are on the boom boom," says Billy Grimes, Eagle, and the banger of the big drum in the band. "I'll shave Zeb Kendall for a year for nothing if we don't beat them," says Ed. Walker, Eagle.

"Not if I know it," returned Zeb: "I'm taking no such chances."

That's the way it goes from morning till night. Everybody in the town queries are coming in by the score from Goldfield. The nurses, doctors, policemen, water carriers, ticket takers, judges and all the characters of the royal circus are rehearsing their parts, and will be letter perfect by Sunday.

Puddy Grimes, the umpire, is rehearsing on the punching bag from morning till night, but even at that he will not venture into the field without the protection of two or more policemen. And likely he will need them. The game will be exciting and one can never tell what may happen. If an Elk makes a home run, there is sure to be a scandal, and if the umpire makes a wrong decision there will be more trouble.

There is one thing sure, though, and that is that the spectators will get their money's worth.

MINING MAN KILLS HIMSELF

LOS ANGELES, Sept. 10.—William Lundgren of Gabriel Anderson, a mining man of Goldfield, shot and killed himself in his room at 303 East Fifth street last Friday evening. He was 35 years of age and had been living in Los Angeles for some time. This man left no note and the motive for his suicide is not known. It is thought that he lost most of his money on stocks and had become melancholy.

TO BAR CHILDREN.

Pennsylvania Mine Inspectors Ordered to Enforce Child-Labor Law. WILKESBARRE, Pa., Sept. 12.—All the mine inspectors throughout the Wyoming district today were ordered by James E. Roderick, chief mine inspector, to investigate the numerous instances of violations of the child-labor laws, and to prosecute every parent and every employer guilty.

Chief Roderick says the law is being violated in every district of the anthracite region. He also urges special vigilance in enforcing the ventilation laws. It is estimated that there are fully 7000 boys under age employed in violation of the law in the mines and breakers.

CASE OF ELEPHANTIASIS.

NEW YORK, Sept. 12.—Physicians at the Kings hospital, Brooklyn, have the most remarkable case of that rare disease, elephantiasis. The patient is Mrs. Juliette Felt of Brooklyn, a widow, 63 years old. Before she was attacked by the disease she weighed 140 pounds. She now weighs 525 pounds and is gaining daily in size. Her skin is thick, hard and coarse, like that of an elephant.

CITIZENS KILL MURDERER.

WEATHERFORD, Okla., Sept. 12.—Crazed by jealousy over attentions paid his wife by another man, and ignoring the pitiful plea of his little daughter clinging to his knees, Lee Leedy, proprietor of a hotel here, today fired three shots into his wife's body, killing her instantly. Two hours later Leedy was shot and instantly killed by a posse of citizens.

STATE FAIR.

\$15,000 in Prizes and Premiums NEVADA STATE AGRICULTURAL ASSOCIATION RACING—RACING At Reno from Sept. 16 to 21 inclusive. Fine Stock, Mineral, Agricultural and Horticultural Exhibits. The Ladies of Tonopah and vicinity have a cordial invitation to attend this event.

Beautiful Display of Millinery

SKYSCRAPER CHURCH.

Rockefeller to Build Sixteen-Story One in Cleveland.

CLEVELAND, O., Sept. 12.—A church that will be the largest and most novel in this country is to be built here by John D. Rockefeller. The edifice is to stand on the present site of the Euclid Avenue Baptist Church, the Rockefeller place of worship, and will bear the name of the present structure.

It will be sixteen stories high and will be institutional in character, having gymnasiums, lecture rooms, rooms for clubs and societies for men, women and children, training schools for missionaries, servants and artisans, a restaurant, dormitories and a hospital with a high class staff.

Do you know that Pinesolve Carbolicized acts like a poultice in drawing out inflammation and poison? It is antiseptic. For cuts, burns, eczema, cracked hands it is immediate relief. Sold by Tonopah Drug Co.
